Engage Your Members and Providers with Financial Transparency

Today, consumers are responsible for 35% of provider revenue, a steep rise from 5% in 2000[1], and that number continues to escalate, creating a need for more financial transparency for both consumers and providers.

Members want more than an easy payment experience. They want to see relevant information about their payment responsibility. As you seek to transition to value-based care reimbursement, your providers will want more clarity about their payment information as well.

By offering electronic EOBs to your members and electronic EOPs to your providers, you are taking a major step toward becoming paperless while creating more positive financial experiences for your members and your providers.

Payspan can manage your existing paper EOBs, get you to 100% paperless payments with providers and offer paperless options for your members.

Increased Member and Provider Satisfaction

- Secure online access to current and historical EOBs
- All payment information in one place
- Better communications with members and providers

Lower Administrative Costs

Gradually reduce and eventually eliminate costs associated with:

- Manual administration
- Handling, filing and mailing
- Non-compliance issues
- Negative audits

We are healthcare's leading solution for orchestrating and automating healthcare payment and reimbursement strategy.

Resource-intensive manual transactions cost on average $6 more than when conducted electronically.[2]
